

ALLEN ACADEMY OPENS AT CALVERT

Football Season With Allen Academy Will Open Next Friday at Calvert With High School.

Announcement was made this morning by Manager C. B. Hudson of the Allen Academy football team that the season for the academy would open on next Friday, October 6th, at Calvert. The game is to be played between his team and the Calvert High School. Mr. Hudson said his team was expecting one of the hardest games of the season right at the start, in as much as the Calvert team has been practicing practically all the summer and is composed of some good material. However, this has no terrors for the academy bunch. Captain DeLoofse of the home team is in very fine shape and will make a record this season no doubt at quarter. While the team has only a few of the old men back this year, Mr. Hudson says the new material is showing up better than ever before. There are three of last year's second team men who will play with the fast company this season and are showing great speed. Among the new material are Hatter, Sellers, Ersek and Redford, who are showing up exceptionally well and in all probability will be used for linemen. Newman of last year's second team is among the best men on the squad this season and in all probability will help fill the back positions.

Manager Hudson said this morning that in the game Friday he would use only the old elementary football. Line plunges and end runs will constitute most of his plays. Quite a number of the student body and several football enthusiasts from this city will accompany the team on the trip.

A NEW ENTERPRISE.

Mr. J. S. Smith has just launched a new enterprise in Bryan in the way of a planing mill. The enterprise is known as the Crescent Wood Working Shop and is located on Regent avenue just across from the Bryan & College Interurban station. Mr. Smith has installed a Universal wood working machine of the latest type. All machines in the plant have safety appliances and it is almost impossible for an employee to be injured. Any kind of work turned out by the larger planing mills in the city can be done in this new shop. All kinds of cabinet work can be done and the Eagle speaks for Mr. Smith a nice business in his new enterprise. The machinery installed required an outlay of about \$1,000 and is an evidence of Mr. Smith's faith in the growth of the city of Bryan.

STUDENTS PLAN LOAN ASSOCIATION

Former Students of Texas State University Plan Loan Association Whereby Students Could Go Through College.

Dallas, Tex., Oct. 4.—At a meeting held here recently plans for the organization and incorporation of the Texas University Students Loan Association were discussed by thirty representatives of the University of Texas Ex-Students Association. Dr. R. E. Vinson, president of the University was present. Plans for the raising of the loan fund were explained by the committee appointed last June to devise some method by which prospective students at the University may borrow money without security to pay their tuition fees at the University of Texas. It was announced that the proposed fund will be \$100,000 and that business men in various sections of the State have already promised to contribute \$25,000. The following committee was named to have charge of the association. Orville Bullington, Wichita Falls, chairman; Royal A. Ferris, Dallas, W. W. Woodson San Antonio; Dr. E. P. Wilmoth, Austin; Wilbur P. Allen, Austin; Dr. R. E. Vinson, Austin; and John A. Lomax, secretary of the University of Texas.

"We want to raise \$100,000 by January 1," said Mr. Bullington, "and we are confident we can do it. The association will always be in a receptive mood for donations from any charitably inclined person or organization, and we will not stop at \$100,000. The money will be loaned to deserving young men and women who want to get an education at the University of Texas, but who have not sufficient means to pay their expenses. It will be loaned in amounts of \$50 or more. Each student will be urged to borrow the smallest amount possible. Interest will be charged on a graduated scale, increasing annually until probably eight per cent is reached. We will make the interest as small as possible while the student is in school. All interest will be added to the fund, which will be permanent."

Dr. Vinson was enthusiastic over the work planned by the former students. The welfare committee named by him soon after his appointment as president of the institution, acts in an advisory capacity when called upon to do so. Another meeting of the committee probably will be held about Thanksgiving at Austin.

"Scientists are now generally agreed that drunkenness is a disease, and that the man who drinks should be treated by a physician." "Oh, well, most men who drink don't care who treats them."—Tit-Bits.

WINTER WILL BE HARD IN ITALY

Coal Has Gone Up to Fifty Dollars a Ton and Living Expenses Are Very High.

(Correspondence of Associated Press.) Rome, Italy, Oct. 4.—The high cost of living and particularly the price of coal is becoming a subject of grave concern in Italy as another war winter approaches. Due to continued excessive freight rates by sea many staple food articles are dearer in Italy than in either France or England. Despite a special treaty with England for cheaper freight rates to be obtained by loading of ships, sugar is selling at 20 cents a pound and can be bought only in small quantities for household consumption from day to day. Coffee sells at 50 to 70 cents a pound, according to grade. Though Italy is a heavy producer of wine, a table wine that once sold at 6 cents a quart now sells for 14 cents and is inferior to the old 6 cent grade. Beer is sold at 14 cents a quart, milk at 10 cents. Good butter is 55 cents a pound.

Coal that before the war sold at \$10 per ton now sells at \$50 and the price may go higher as winter comes. Last winter it was \$30 to \$40 per ton. Italy hopes to import 750,000 tons from England and 250,000 tons from the United States for industrial uses this winter.

FOOD PRICES ARE ALL ADVANCING

Flour Higher Than at Any Time Since the Civil War—Potatoes and Meats Also High.

(By Associated Press.) Washington, D. C., Oct. 4.—Marked increase in the cost of living was shown in the rising tendency of foodstuffs on October 1st, reports of which are being received by the department of agriculture. Flour is selling at a higher price than at any time since the civil war, due principally to the shortage of the wheat crop, and the cost of potatoes mounted for the same reason. Meat prices have advanced 24 per cent over one year ago. Dairy products are also higher. Onions are 50 per cent higher and cabbage has advanced 40 per cent.

"When Bois Penrose and Gifford Pinchot can vote the same ticket," says the Philadelphia Press, "there is no reason to despair of the country." But there is considerable reason to despair of Gifford Pinchot.—Charles-ton News and Courier.

Slip a few Prince Albert smokes into your system!

You've heard many an earful about the Prince Albert patented process that cuts out bite and parch and lets you smoke your fill without a comeback! Stake your bank roll that it proves out every hour of the day. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

There's sport smoking a pipe or rolling your own, but you know that you've got to have the right tobacco! We tell you Prince Albert will bang the doors wide open for you to come in on a good time firing up every little so often, without a

regret! You'll feel like your smoke past has been wasted and will be sorry you cannot back up for a fresh start.

You swing on this say-so like it was a tip to a thousand-dollar bill! It's worth that in happiness and contentment to you, to every man who knows what can be gotten out of a chummy jimmy pipe or a makin's cigarette with Prince Albert for "packing"!

PRINCE ALBERT

the national joy smoke

THE Prince Albert cigarette is a real message to you on its reverse side. You'll read: "Process Patented July 30, 1907." That means that the United States Government has granted a patent on the process by which Prince Albert is made. And by which tobacco bite and parch are cut out! Everywhere tobacco is sold you'll find Prince Albert enveloping you in toasty red bags, in tidy red tins, in handsome round and half-round tin humidor and in that clever crystal glass humidor, with sponge-mulined top, that keeps the tobacco in such fine condition—always!

R. J. REYNOLDS TOBACCO CO.
Winston-Salem, N. C.

This is the reverse side of the tin.

THE CITY SCHOOLS.

Myrtle McCullough and Hettie Edge, 1916 graduates, are back again to take the course in chemistry and to take more home economics.

Lillian Hanneman, class of 1916, enters the University of Texas this year. She enters on her Bryan High School record, without examination, of course.

Frances Rose Mike spent the summer in the University of Texas, entering on her Bryan High School record, just as others do.

At the College of Industrial Arts, Lucy Harrison, class of 1915, Bryan High School, leads them all. This year two other Bryan High School graduates, Ardella Jones and Bernardine McKnight, enter the same school on their diplomas without examination.

The room which for years has been called "the office" by successive groups of young people passing through school, is now the home of the department of language under Miss Weddington. The change was effective Tuesday.

A number of parents and children are telling us where the young people are to go after finishing in the Bryan High School. That gives time to plan their courses to suit the needs of those persons.

Louis Pipkin, class of 1915, goes back to Baylor College, where she made a great record last year. Baylor College has learned to be proud of her.

Ferne Dansby, class of 1916, goes to Texas Presbyterian College this year, where she will do what she has always done—make one of the best records in the school she attends.

He starts out well. He knows what to do and does it. That means Eugene S. Lawler, B. A., teacher of mathematics, Bryan High School.

Maude Brogdon, after a year in Beaumont, is back home to finish her course in Bryan High School.

Irene Fairman is a new member of our senior class this year, and we are glad to have her. People know where to go to get the best in school work.

Miss Alice Bartis has entered the Bryan High School for special courses. She knows what she wants and where to get it.

Mr. Miller is doing fine work in his departments, as he always does. Bringing him to the Bryan schools is an achievement of which the superintendent is proud.

W. C. LAWSON,
Superintendent.

SAYS CROP BELOW 11,367,000 BALES

President of Farmers' Union Says Top Crop is Smallest in History and Was Overestimated.

Fort Worth, Tex., Oct. 4.—The present cotton crop will fall short of the 11,367,000-bale estimate issued Monday by the United States department of agriculture. According to Henry N. Pope, president of the Association of State Farmers Unions Presidents, the government's first estimate was for a crop of 14,000,000 bales, but this has been reduced 2,600,000 bales by the revised figures and is said to be caused by the climatic and pest damage, but according to President Pope these two factors are going to be instrumental in further reducing the revised estimate.

"The top crop, which is the smallest in history, has also been generally overestimated," said Mr. Pope, "and the present cotton crop while one of large acreage, is the smallest yield per acre within 20 years and the indications are it will bring the highest aggregate price of any crop in the history of the cotton industry. It is an established fact that small production is usually followed the next year by a large acreage and a heavy yield. The cotton farmer will never get out of debt nor will the tenant become a home owner until we get a reasonable price for a reasonable crop. Ever since the South has been planting 30,000,000 acres in cotton each year the cotton farmers have been selling cotton about 3 cents per pound less than cost to production. The only protection of a cotton farmer against a calamity of low price is in a 12-cent minimum by government or some agency capable of protecting it."

"Charley, dear," said young Mrs. Torkins, "I have good news." "What is it?" "The bank sent me word that my account is overdrawn. I looked in the synonymy book and found that 'overdrawn' is the same as 'exaggerated'."—Washington Star.

DON'T RISK NEGLECT

Don't neglect a constant backache, sharp, darting pains or urinary disorders. The danger of dropsy or Bright's disease is too serious to ignore. Use Doan's Kidney Pills as have your friends and neighbors. A Bryan case.

T. H. Spell, Railroad St., Bryan, says: "My kidneys gave me a lot of trouble. I had sharp catches in the small of the back and at times I could hardly bend over. It was just as hard for me to straighten up. I had spells of dizziness and objects floated before my eyes, so that I could hardly see. The kidney secretions passed too frequently, especially at night. Doan's Kidney Pills, procured at Emmel's Drug Store soon strengthened by back and put my kidneys in good condition."

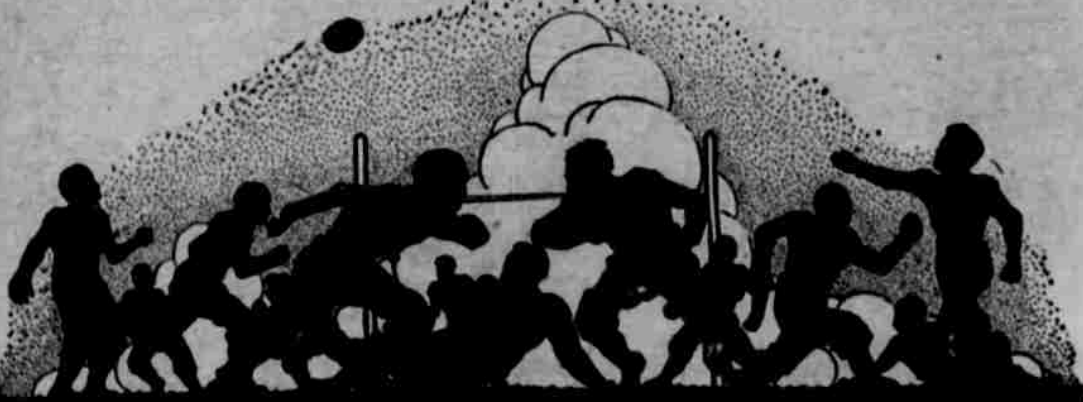

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Spell had. Foster-Milburn Co., Props., Buffalo, N. Y.

SEARCHING FOR AUTOMOBILES.

Mr. Frank Webb of the White & Webb Automobile Company left this afternoon for Fort Worth in an effort to get hold of a car load of Chevrolet cars which they have sold. Mr. Webb said this morning that the sale of this car was immense and they had been to several distributing points in Texas, but so far had been unable to get any cars, hence his trip to Fort Worth.

BUILDING SPUR TRACK.

A large force of workmen are busy today building the spur track around the platform on the west side of the H. & T. C. freight depot. The track will hug the platform all the way round the edge and will join on the main switch track just south of the freight depot or just north of 27th street. A short spur or unloading track has been left on the east side of the main siding for the use of the Myers Hardware Company.

Putting It Over The Line

Many a man can think up plays in sport or business who lacks the rugged strength and energy to carry them out.

Human power comes from food, and it is vitally essential that it contain the elements required by both body and brain—in good balance, and in form for prompt digestion.

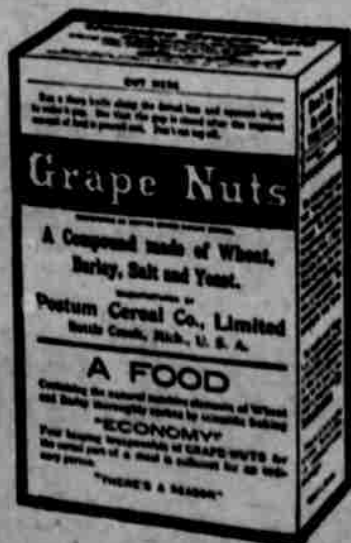

Grape-Nuts

with Cream

combines all the nutriment of whole wheat and malted barley, including their mineral salts so necessary to thorough nourishment.

Grape-Nuts is a winning food—ready to eat direct from package, easy to digest, richly nourishing, and wonderfully delicious.

Every table should have its daily ration of Grape-Nuts.
